Corps of Engineers holds workshop on Little Fossil Creek flood study

The Fort Worth District, U.S. Army Corps of Engineers, working for Haltom City, will host an information workshop on the alternatives for flood damage protection on Little Fossil Creek. The workshop is scheduled for April 18, 2000, beginning at 7:00 p.m. at the Haltom City Library, 3201 Friendly Lane.

The Corps has evaluated a number of alternatives between Walthall Drive and the corporate border with the city of Fort Worth. Based on the technical, environmental and economic impacts of each alternative investigated, a recommended plan has been identified and will be discussed at the workshop.

Officials from the Corps of Engineers and Haltom City encourage public participation during the workshop which will be both informative and beneficial in receiving feedback from interested parties on the recommended plan.

For more information, contact Eli Kangas, Project Manager, at (817) 978-3753 or Ken Slovak, the Haltom City Director of Administrative Services, at (817) 222-7760.
